

## Generic Report for GitHub Repository Scan

Field	Details
Repository Owner	Redwan-Islam
Repository Link	<a href="https://github.com/Redwan-Islam/ProjectV1">https://github.com/Redwan-Islam/ProjectV1</a>
Scan Time	2025-01-02 18:04:48
Types of Malicious Code Found	None
File Details	None
Threat Level	Low
Static Analysis Results	Static analysis tools removed.
How to Prevent This	1. Code Review: Regularly review code for suspicious patterns and practices. 2. Static Analysis Tools: Use tools that can analyze code for potential vulnerabilities. 3. Limit Permissions: Ensure that the code runs with the least privileges necessary. 4. Educate Developers: Train developers on secure coding practices and common vulnerabilities.
Abstract of the Code Repository	The repository contains various scripts and modules primarily written in Python, HTML. The code is designed to perform various data processing tasks. However, it includes patterns that may lead to security vulnerabilities.
